HISTORY OF ANYKŠČIAI

In 1792 the town received an official blazon.

Anykščiai is the town situated in the North-Eastern part of Lithuania, 33 km away from Utena, in the Anykščiai mountain-ridge (95-112 meters above the sea level).

Archeological findings show first citizens of Anykščiai district since 9000 B.C. The town's name was first mentioned as Anykščiai Manor of Lithuania's Duke Kazimieras. He wrote in his letters that he is assigning the manor for Radvila Astikaitis. During 1442–1452, first wooden church was built in town. In the XV century, the town Anykščiai is being mentioned. In 1507 the lands of the parson were adjusted. In 1516 the town got the rights of the town and the Manor of Anykščiai with the town to be given to Mikalojus Radvila.

In 1566 the town suffered several fires. The church was burnt to the ground, but it was soon to be re-built. In 1671 the church of Anykščiai was burnt down again (re-built in 1677). In the beginning of XVIII century, the bridge was demolished due to the wars with swedish. It was re-built in the end of XVIII century. In 1792, king Stanislovas Augustas gave the town rights and a blazon. The blazon consists out of the new bridge which was built right before receiving an autonomy, and the statue of st. Jonas Nepomukas, the watchman of the bridges.

In the XIX century, the town grew bigger. Here was a church with the steeple and two synagogues. When the 1831 uprising was put down, the town belonged to the russian empire. During the uprising of 1863 the gun factory was opened here. In 1898 the narrow-gauge railway started operating with the track Panevėžys-Švenčionėliai. In 1902 the hydro power plant was built in Anykščiai. 7 years later, in the place of where an old church was built, new church was established (neogothic style).

Since 1929 local winery works in Anykščiai. In 1938, the rights of the town were re-newed. During the wars, a lot of people died, mainly Jewish. In 1944 the town was a battlefield for the nazis and the soviets. In 1968 the factory of sand-intensity was opened („Kvarcas), as well as the mansion of culture and the blocks of living houses „Ramybė“. During 1988–1992, the railway was operating for children, on the route Anykščiai-Rubikiai.

In 1992 the new blazon was confirmed. In 2012 Anykščiai town was selected to be The Capital of Lithuanian Culture. Anykščiai is rich with the variety of attractions for everyone, including nature, active and passive leisure, events, local culture, traditions, heritage. Dvaronys, Anykščiai district, GPS: 55.484224, 25.059657 (WGS)

The most popular boulder in Lithuania is located in the Landscape Reserve of the Forest of Anykščiai. This is the second boulder in Lithuania according to its size (after Barstyčiai Stone) Puntukas was carried not only by ice; it was carried by the Devil himself, wanting to smash the church of Anykščiai... But the rooster crowed and the evil one dropped Puntukas out of his claws and the stone "as big as a house" fell down in the forest... Thus says the poem The Forest of Anykščiai, written by Antanas Baranauskas. Puntukas attracts its visitors not only as an impressive geological monument or mythological stone, mentioned in a number of legends. During the years of German occupation, in the middle of the summer of 1943, the sculptor Bronius Pundzius completed the bas-reliefs and words from the testaments of Steponas Darius and Stasys Girėnas, the pilots that have flown across the Atlantic Ocean.

These ditches are the riverbeds of a number of springs – Marčiupys, Piktupis, Išplėstravis, Vingerštyinė, Pakalnūtė, Paramavietė, Gaugarys, Pašaltupys, Limenė and Šlavė. Šlavė sometimes penetrates deeply into the ground (sometimes even reaching 25 metre deep) between high shores and exposures.
